

Overview

Scenario

Name: Flag Command

Description: Embark on the "Dimensional Escape Quest" where you wake up in a mysterious forest maze that's not quite of this world. Navigate singing squirrels, mischievous nymphs, and grumpy wizards in a whimsical labyrinth that may lead to otherworldly surprises. Will you conquer the enchanted maze or find yourself lost in a different dimension of magical challenges? The journey unfolds in this mystical escape!

Solving

- Access to the website: <http://154.57.164.81:31468/> see the emulated terminal interface -> Enter the command with normal movements (HEAD NORTH,...)

```
It's packed with enough freaks and frights to
make a horror movie blush. Time to find your
way out.
The stakes? Oh, nothing big. Just your friends,
plunged into an abyss of darkness and despair.
Punch in 'start' to kick things off in this
twisted adventure!

>> start

YOU WAKE UP IN A FOREST.

You have 4 options!
HEAD NORTH
HEAD SOUTH
HEAD EAST
HEAD WEST
```

- View source code and see relative scripts: main.js, game.js and command.js.

```
overflow
▶ <div id="command">...</div>
  <audio id="typing-sound" src="/static/terminal/audio/typing_sound.mp3"
    preload="auto"></audio>
  <script src="/static/terminal/js/commands.js" type="module"></script>
  <script src="/static/terminal/js/main.js" type="module"></script>
  <script src="/static/terminal/js/game.js" type="module"></script>
▶ <script type="module">...</script>
```

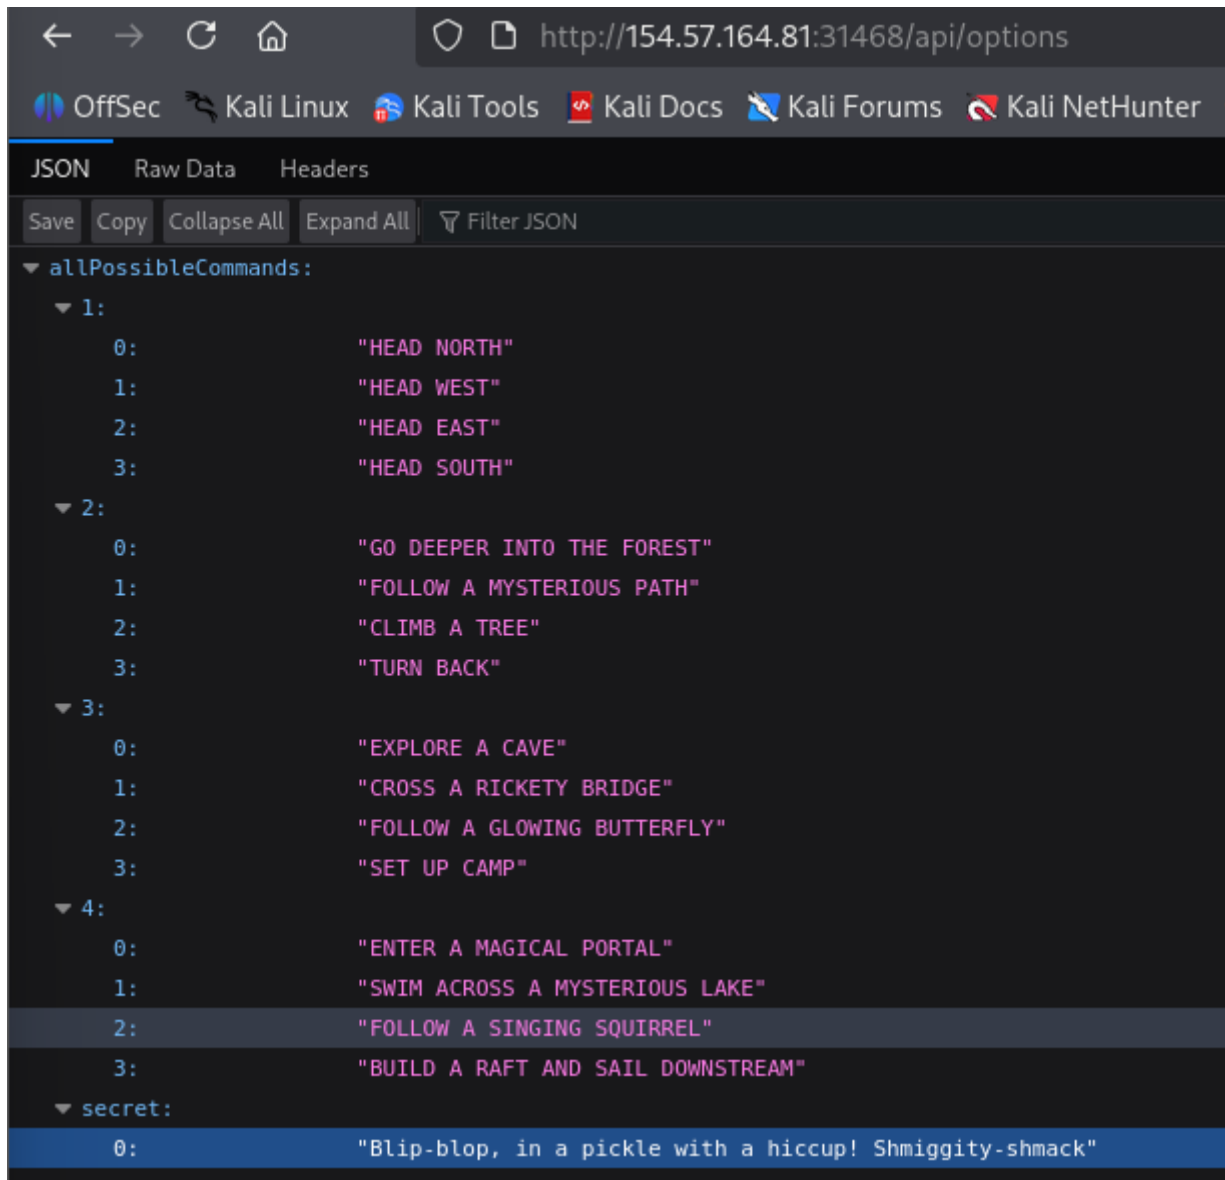

- Debugger -> view source code of these files. In file `main.js`, the function `fetchOptions` call `/api/options` -> retrieve the list of available commands from the server and store them in to `availableOptions`.

```
const fetchOptions = () => {  
  fetch('/api/options')  
    .then((data) => data.json())  
    .then((res) => {  
      availableOptions = res.allPossibleCommands;  
    })  
    .catch(() => {  
      availableOptions = undefined;  
    })  
}
```

- Function `CheckMessage()`: if having secret commands in `availableOptions`, maybe having the flag

```
// .....  
async function CheckMessage() {  
  fetchingResponse = true;  
  currentCommand = commandHistory[commandHistory.length - 1];  
  
  if (availableOptions[currentStep].includes(currentCommand) || availableOptions['secret'].includes(currentCommand)) {  
    await fetch('/api/monitor', {  
      method: 'POST',  
      headers: {  
        'Content-Type': 'application/json'  
      },  
      body: JSON.stringify({ 'command': currentCommand })  
    })  
      .then((res) => res.json())  
      .then(async (data) => {  
        console.log(data)  
        await displayLineInTerminal({ text: data.message });  
  
        if (data.message.includes('Game over')) {  
          playerLost();  
          fetchingResponse = false;  
          return;  
        }  
  
        if (data.message.includes('HTB{')) {  
          playerWon();  
          fetchingResponse = false;  
          return;  
        }  
  
        if (currentCommand == 'HEAD NORTH') {  
          currentStep = '2';  
        }  
        else if (currentCommand == 'FOLLOW A MYSTERIOUS PATH') {  
          currentStep = '3';  
        }  
        else if (currentCommand == 'SET UP CAMP') {  
          currentStep = '4';  
        }  
  
        let lineBreak = document.createElement("br");  
      })  
  }  
}
```

- Access to the link: `/api/options` and see the secret.

- Enter the secret and get the flag.

```
>> Blip-blop, in a pickle with a hiccup!
